- ADA UK charity website
- my portfolio website

Soft Skills

- strong understanding of Git and Docker
- Agile development with Scrum framework
- strong understanding of SDLC
- Comprehensive database understanding
- Strong communication skill
- strong problem-solving skill

SOFTWARE ENGINEER

I am a highly competent software developer with very good experience in developing software for cross-platform.

I have proven my skills in building my final year project called the "Students to Students" support system. I understand the system development lifecycle (SDLC) in-depth and I am experienced in all aspects of development from project planning to requirements gathering through to programming and testing codes, creating documentation, and support.

I am currently seeking long-term contract positions as a Software Developer which will allow me to further apply my programming and project management skills.

Education History

LONDON SOUTH BANK UNIVERSITY

Bachelor of Computer Science 2021

Freelance Work Experience
From November 2021 ongoing

- I have learned to create custom websites by harnessing HTML, CSS, and JavaScript skills.
